

MITCHELL MILLER

AI Search & AEO/GEO Optimization Engineer

San Jose, CA | Remote-first | (626) 316-8682 | mitchelljmillerjr26@gmail.com | linkedin.com/in/mitchelljmillerjr

AI-search engineer specializing in AEO/GEO optimization, LLM citation visibility, and the measurement systems behind them. Builds entity-first content infrastructure and internal AI tooling (Python, RAG, agents, evals) and engineers brand presence across ChatGPT, Perplexity, and Google AI Overviews - backed by 10+ years of enterprise technical SEO and a 1,000+ page structured-data system.

POSITIONING

Hands-on AI-search engineer: AEO/GEO measurement, LLM citation optimization, entity systems, and AI tooling.

Strong fit for AI Search, AEO/GEO Engineer, and AI Optimization Engineer roles.

AI SEARCH STACK

AEO / GEO

Profound, AI share-of-voice, citation velocity, prompt clusters, LLM citation optimization.

AI Engineering

Claude API, OpenAI, RAG, agent workflows, evals, Python, TypeScript.

Entity Systems

Knowledge Graph, schema, Wikidata, Yext, structured data, citation networks.

TECHNICAL SEO

Crawl/render, JS indexation, migrations, Core Web Vitals, HTTP headers, multi-CMS architecture.

DATA

SQL, SQLite, BigQuery, statistical modeling, simulation, U.S. Census microdata, attribution modeling.

EDUCATION

Michigan State

BA, Business Administration - Eli Broad College of Business.

EXPERIENCE

Clarity Digital - Senior AI Search Strategist / AI Systems Consultant

Engineered AEO/GEO measurement infrastructure and shipped internal AI tooling for AI-search visibility.

Nov 2023 - Present | Remote

- Built internal AI tooling - ClarityPulse, SearchForge, and ActionThread - replacing reporting, content intelligence, and call-workflow tools across agency operations.
- Designed and deployed AEO measurement infrastructure using Profound to track brand citation velocity and AI share-of-voice across ChatGPT, Perplexity, and Google AI Overviews.
- Engineered entity-first content systems for Knowledge Graph and AI retrieval inclusion: structured data, Wikidata validation, citation networks, topical authority, and internal linking.
- Led technical SEO, AEO, and GEO audit processes for enterprise accounts, translating AI-search visibility problems into client-ready roadmaps and implementation plans.

Stanford Health Care - Interim SEO/SEM Manager

Restructured paid/organic systems around generative-search query behavior.

Mar 2024 - Aug 2024 | Palo Alto, CA

- Restructured campaign taxonomy and bidding logic around emerging AI-driven search behavior and high-intent generative-search query patterns.
- Owned paid and organic search across high-value clinical service lines, including budget, measurement, keyword strategy, and stakeholder communication against patient-acquisition targets.
- Partnered with Content, UX, and clinical strategy teams to connect keyword strategy, patient-journey content, and conversion performance.

Apple - Global SEO Program Manager, Americas

Resolved JavaScript rendering and indexation gaps in Apple's proprietary framework with engineering.

Aug 2022 - Jan 2024 | Cupertino, CA

- Identified and resolved JavaScript rendering and indexation gaps in Apple's proprietary JS framework; partnered directly with engineering and design teams on remediation.
- Owned organic search strategy for Apple's Americas product and services portfolio across a multi-billion-dollar revenue surface.
- Built business cases that secured engineering roadmap prioritization by combining competitive analysis, search demand, technical findings, and revenue projections.

CERTIFICATIONS

GA4, Google Ads Search, Google AI Essentials, AI for Marketing, Content Strategy, CAPM, PSM I, Product School PM, Google Project Management, Agile with Jira, UX Design.

SELECTED AI BUILDS

ClarityPulse, SearchForge, ActionThread - internal AI tools.

AEO measurement across ChatGPT, Perplexity, and Google AI Overviews.

SELECTED WINS

Three internal AI products shipped

1,000+ Yext entity pages (Google, Apple Maps, Siri, Alexa)

AEO infra across ChatGPT, Perplexity, AI Overviews

California UBI Simulator - 39.5M, real Census data

138 hreflang variants / 38+ country sites

\$15.21M FY22 attributable revenue

WORKING STYLE

Engineer-operator: instrument first, build measurement before optimization, ship small internal tools, and validate AI-search gains with evals and real data.

EXPERIENCE CONTINUED

CommonSpirit Health - SEO & Web Analytics Product Manager

Built 1,000+ entity pages and structured-data syndication; partnered with Data Science on attribution.

Sept 2018 - Aug 2022 | Remote

- Defined requirements and led delivery of 1,000+ Yext entity pages with parent/child architecture and dynamic CMS templates, syndicating structured data across Google, Apple Maps, Siri, and Alexa.
- Led 20+ enterprise migrations with technical requirements, stakeholder coordination, post-launch audits, and conversion recovery; partnered with Data Science on attribution modeling.
- Owned roadmap, requirements, stakeholder alignment, and measurement for a 20+ market healthcare network; FY22 output included \$15.21M attributable revenue, 88K appointments, and 175K calls/directions.

Wpromote / DemandWave - SEO Campaign Manager

Server-level technical audits across multi-CMS environments.

Apr 2015 - Aug 2018 | San Francisco, CA

- Conducted server-level audits across Apache, IIS, HTTP headers, PHP, and multi-CMS environments; built internal training curriculum that scaled technical methodology across the agency.
- Directed full-lifecycle SEO and growth programs across clients including Unilever, BeyondTrust, Dynapar, and Whoop; translated audits into engineering, content, and CRO workstreams.

SELECTED AI + GROWTH BUILDS (SIDE PROJECTS)

California UBI Simulator

- Built (AI-assisted) a live policy sandbox that models universal basic income across real U.S. Census microdata for all 39.5M Californians, computing distributional and fiscal impact in real time from adjustable payment parameters.

DomainSignal

- Founder / solo build of an AI-driven domain authority and intelligence platform using statistical models, scoring algorithms, and AI-paired insight generation.

Clear Kayak Adventures

- Built website, OTA listings, payments, SOPs, safety workflows, pre-arrival CRM education, staff handoffs, and automation supporting \$500-\$1,000/day per location before state permit moratorium.

Date Night

- Couples-focused dating app prototype for people done swiping; product concept, positioning, and app workflow built around shared planning and relationship-first discovery.
